February 21, 2012

Mr. James Rozell  
Control Products Corporation  
1513 W. Jefferson  
Grand Prairie, Texas 75051

Dear Mr. Rozell:

The purpose of this letter is to formally notify you of a change that has taken place within the Fort Worth Manufacturing Inspection District Office (MIDO) that will have an impact on the way you communicate with the Federal Aviation Administration (FAA).

Effective February 27, 2012, Mr. John Dvorachek, Aviation Safety Inspector (ASI), assigned to the Fort Worth MIDO, will assume responsibility for oversight of your facility and be your primary point of contact for all FAA related matters involving your Production Approval.

**New Contact Information:**

Address: Federal Aviation Administration  
Fort Worth MIDO, SW MIDO-42  
ATTN: Mr. John Dvorachek  
2601 Meacham Boulevard  
Fort Worth, Texas 76137

Phone: (817) 222-5109  
Fax: (817) 222-5696  
E-mail: john.dvorachek@faa.gov

This change will remain in effect until further notice. If you have any questions, or in the event that your assigned inspector is unavailable, please contact our office at (817) 222-5819.

Sincerely,

Carlton N. Cochran  
Manager, Fort Worth Manufacturing Inspection District Office  
SW MIDO-42

FEDERAL AVIATION ADMINISTRATION - PARTS MANUFACTURER APPROVAL

Dear Mr. Rozell:

On October 16, 2009, the Federal Aviation Administration (FAA) published a rule revising Title 14, Code of Federal Regulations (14 CFR), part 21, Certification Procedures for Products, Articles, and Parts, effective April 16, 2011. The revised part 21 contains changes that affect your Parts Manufacturer Approval (PMA) letter November 2, 1995. This letter serves as a replacement to that PMA letter to address the part 21 changes.

In accordance with 14 CFR, part 21, Certification Procedures for Products, Articles and Parts, subpart K, the FAA has found that the design data, as submitted by Control Products Corporation, (hereinafter referred to as "the Manufacturer") on August 23, 1995, meet the airworthiness requirements of 14 CFR applicable to the products on which the articles is to be installed. Additionally, the FAA has determined that the Manufacturer has established the quality system required by § 21.307 at 1513 W. Jefferson Street, Grand Prairie, TX 75051. Accordingly, PMA is hereby granted to the Manufacturer to produce the replacement articles (or modification articles, as applicable) listed in the supplements issued that are dated prior to this letter and in conformity with the FAA-approved design data. Subsequent changes to these design data must be approved in a manner acceptable to the FAA.

The following terms and conditions apply to this approval:

1. The Manufacturer's quality system, methods, procedures, and manufacturing facilities, including suppliers, are subject to FAA surveillance and investigations. Accordingly, the Manufacturer must advise its suppliers that their facilities are also subject to FAA surveillance and investigations.
2. The Manufacturer must obtain approval from the Fort Worth Manufacturing Inspection District Office (MIDO) prior to relocating or expanding manufacturing facilities at which articles are produced; this includes the addition of associate facilities. Additionally, this requirement applies to the Manufacturer's suppliers with major inspection authorization and those suppliers who furnish articles or related services where a determination of safety and

conformance to the approved design cannot or will not be made upon receipt at the approved receiving facility.

3. Upon request, the Manufacturer must make available to the FAA any pertinent information concerning their suppliers who furnish parts/services. This includes:

- a. A description of the part or service;
- b. Where and by whom the part or service will undergo inspection;
- c. Any delegation of inspection duties;
- d. Any delegation of materials review authority;
- e. The name and title of the FAA contact at the supplier facility;
- f. The inspection procedures required to be implemented;
- g. Any direct-shipment authority;
- h. Results of the Manufacturer's evaluation, audit, and/or surveillance of their suppliers;
- i. The purchase/work order number (or equivalent); and
- j. Any feedback relative to service difficulties originating at the Manufacturer's suppliers.

4. Parts, appliances, or manufacturing services furnished by any suppliers located in a foreign country may not be used in the production of any article or appliance listed in the enclosed supplement unless:

- a. That part or service can and will be completely inspected for conformity at the Manufacturer's United States facility; or
- b. The FAA has determined that the location of the foreign supplier facility places no undue burden on the FAA in administering applicable airworthiness requirements. The Manufacturer must advise the FAA at least ten working days in advance when the use of such foreign suppliers is contemplated to allow the FAA time to make this determination.

5. Articles produced under the terms of this approval must be permanently marked with the identification information as required by 14 CFR part 45 § 45.15, Identification and Registration Marking. Use the letters "FAA-PMA," the name, trademark, or symbol of the company, and the part number. If the FAA finds the article is too small or impractical to mark, the manufacturer must attach the information required by § 45.15 to the article or its container.

6. This approval is not transferable and it may be withdrawn for any reason that precludes its issuance or whenever the FAA finds that the quality system is not being maintained. A withdrawal may occur if unsafe or nonconforming articles are accepted under the quality system.

7. The Fort Worth MIDO must approve any changes to the address shown in this approval.

8. The Manufacturer must maintain its quality system in continuous compliance with the requirements of § 21.307. The Manufacturer also must ensure that each article conforms to the approved design data and is safe for installation on type-certificated products.

9. A PMA holder has the privileges specified within the PMA letter and supplement. In addition, a PMA holder is eligible for the appointment of qualified individuals in its employ to represent the FAA as Designated Manufacturing Inspection Representatives (DMIRs), in accordance with the provisions of part 183. The DMIR may issue export airworthiness approvals for articles. The PMA holder may also be authorized to apply for and obtain an Organization Designation Authorization (ODA). FAA Orders 8100.8 and 8100.15 contain procedures for the administration of DMIRs and ODAs, respectively.

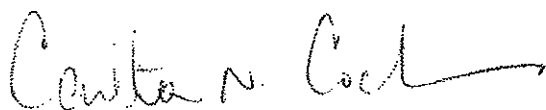

10. The Manufacturer must report in a timely manner, to the Fort Worth MIDO, information concerning service difficulties on any article produced under this approval. The Manufacturer also must report any failures, malfunctions, and defects that are required to be reported in accordance with § 21.3.

11. All technical data required by § 21.303(a)(3), for the articles to be produced in accordance with this approval, must be readily available to the FAA at the facility where the articles are being produced.

12. The Manufacturer must notify the Fort Worth MIDO immediately in writing of any changes to the quality system that may affect the inspection, conformity, or airworthiness of the articles approved in this letter.

13. The Manufacturer must produce all articles in accordance with the FAA-approved Control Products Corporation Quality Management System Standard, Revision H, dated April 14, 2011, that has been presented as evidence of compliance with §§ 21.307 and 21.308. Accordingly, any revisions to this data must be submitted to the Fort Worth MIDO for approval prior to implementation.

Sincerely,

Carlton N. Cochran  
Manager, Fort Worth Manufacturing Inspection District Office  
SW MIDO-42
